## What is energy medicine?

It is a method of using Universal energy to raise the frequency of the body. Some practitioners prefer to use hands-on while others just send or project energy out of their hands into the client's energy field.

When an application of higher frequencies is applied to a person they naturally feel lighter and better. Some people feel spacey. Their life gets better!

**A person feels bad when their energy flow gets low** and is most likely to "catch a cold" or get the flu. When the energy field is high the person feels inner peace, joy, and a connection to Source energy. Energy medicine can be applied to yourself just as easily as to another.

When one is able to flow more Source energy they will enjoy fewer or no visits to the doctor's office, fewer or no prescription pills to take, and experience no bad side effects ...except sometimes a slight healing crisis while the body releases toxins.

## 7 Reasons To Discover Your Personal Healing Energy?

1. If you don't learn this **You are wasting this natural ability** to heal others and yourself; however, without some formal training you cannot fully use the tools. You are already hard wired to do this energy medicine.
2. **The Laser Reiki methods of working with energy will Change Your Life!** you can easily and quickly find the root cause of problems. Symptoms naturally disappear with the root cause gone.
3. **So you can:**
  - ♥ Clear blockages/dark energy.
  - ♥ Increase the natural high frequency flow of the Life Force through you. (Feel good again like a small child.)
  - ♥ The client is able to immediately feel the higher vibrations of the energy renewal.
4. **You can work on all levels of consciousness at the same time clearing blockages.**
  - ♥ The physical body
  - ♥ Mental and emotional levels
  - ♥ Spiritual levels
5. **In quantum physics thoughts cause energy** to create physical manifestations (the quantum wave changes to the quantum particle). So by learning to use your energy, thoughts, and actions correctly it will improve your health, wealth, and happiness. A thought's energy precedes physical manifestation – therefore cleaning out negative energy

will refine your health and other aspects of your life! You Lighten Up!

6. **Energy healing** is the only kind of healing used in the heavens. If you become a *grand cosmic being* while living in the body, you have better choices after the body dies.
7. **Learn energy medicine because: "It's fun to free yourself and others of energy blockages and ancient curses!"**
